virtual event designer

Attention Event Professionals! Your easy-to-use event design solution has finally arrived.

Meet Vivien—A new comprehensive event design software available to meeting and event professionals.

Simple and intuitive, Vivien is everything needed to create memorable events on time and within budget. Vivien expedites every process. It's the closest thing to being on site—a sneak-peek of your event revealed with realism and accuracy.

Easy-to-use diagramming tools enable complete customization. Begin by choosing a venue and selecting from a diverse library of tables, chairs, banquet and staging items. Go a step further to include colours and textures. Use the seating wizard to automatically calculate and draw seating arrangements. Create a mood with desired lighting and then view your creation from every imaginable angle.

And while you're busy designing your venue set-up, Vivien's master spreadsheet is tracking all your items in a file.

Feel like making a modification to your event design? Go ahead. Changes are instantly reflected because your model and database are completely integrated at all times.

Impress your clients with presentations that contain stunning 3D drawings and 2D floor plans detailing your event. Your event will be set-up as you imagined—the first time, every time.

Features include:

- Easy-to-use 2D and 3D diagramming
- Basic and advanced drawing tools
- Multiple working views including: front, back, sides, top, bottom, isometric, and shaded
- Excellent zooming and maneuvering abilities

- Camera set-up for increased visualization
